Calling Journalists and Data Scientists to Participate in the CSOs Impact Storytelling Challenge

About MediaSpace Tanzania

MediaSpace Tanzania (MediaSpace) is an innovation and ICT-based organisation promoting, on one hand; a dynamic, free and responsible media sector, and on the other; public access to media where the public is free to express their voices. Our approach includes storytelling, curation of women and youth voices, co-creation as well as partnership mind-cracking. We desire to inspire change and empower the public to embrace good governance, democratic values and human rights for sustainable community development. Through our programmes, we are striving to create active citizenry; innovative, free and responsible media; as well as free spaces to dialogue and discuss issues.

Who and What we are looking for?

1. Qualified and Experienced journalists – holders of a diploma or degree in journalism from recognized schools of journalism and at least three years of experience with a track record in covering investigative, development and public interest journalism stories to cover stories for “**CSOs Impact Storytelling Challenge**”. Experience in working as a Data Journalist will be an added advantage but not a must.
2. Qualified and experienced Data Scientists – Professional data scientists with a track record of not less than one year in developing and designing data reports, stories and infographics to support journalists to curate data-driven impact stories for the “**CSOs Impact Storytelling Challenge**”. If you are still a student, but meet the required skills, you can still apply with a recommendation from a professional or certified data expert.

How can you Apply?

If you think you have the qualities and credentials we are looking for, send us 3 samples of your work for consideration.

Submit your application for through: info@mediaspace.or.tz with the subject “**CSOs Impact Storytelling Challenge**” **Journalist /Data Scientist**.

Deadline for applications is 15th May 2020.
